

How To Use Computer Crates

1 Wrapping:

- Place computer unit and monitor in anti-static, reusable bubblewrap bags or flatscreen monitor bag
- Place keyboard, mouse and wires in polypropylene zipperlocking bag

2 Packing:

- Pack first *empty* crate on dolly
- Pack wrapped computer tower in bottom of the crate (as shown)—CPU is stronger when laid flat than it is standing
- Pack computer monitor on top of tower (as shown)
- Pack keyboard, mouse and wires
- Close lid

3 One Computer = One Crate = Simple

4 Stacking

- Place second *empty* crate on top of first and repeat process
- Place moving label on end of crate
- Secure crate lid with numbered ties

5 Ready to Go! (one man push)

It's safe, secure & simple!
